EDUCATION

Ovidius University of Constanta
BA in Computer Science
Constanta, 2018 - 2021

ABOUT ME

I am a senior ReactJs developer / contractor / freelancer with **6+ years of experience**, only interested in remote work.

I leverage my expertise, skills, and passion to identify and implement software solutions tailored to my clients' needs.

Drop me a message if you think my expertise could help your organization!

WORK EXPERIENCE

Senior React Developer
September 2024 - March 2025

Smart Chatbot Application | Freelancer

The client, a startup in the large language model industry, was struggling with helping users in the USA choose and process the right insurance based on their needs.

- **Boosted client adoption by 3X** by designing the application's infrastructure and user interface.
- **Reduced application running costs by 50%** by developing a scalable solution tailored to the client's needs.
- **Reduced AI running costs by 2X** by developing a memory optimization solution.
- **Ensured stability of the large language model** by writing optimized prompts for the system.

Skills: LLM, ReactJs, NodeJs, NextJs, GPT, Python

Senior React Developer
March 2024 - September 2024

Funds Management Application | Endava

The client, a leading provider of investment portfolio management and fund solutions, was struggling to improve investor profitability.

- **Gained an increase in user retention by 50%** by implementing a new charts module.
- **Increased user retention by 30% per year** by developing an app that allows investors to track their profitability.
- **Improved scalability and performance** by optimizing the application architecture.

Skills: GraphQL, NextJs, React, TypeScript

Senior NodeJs Developer
March 2023 - February 2024

Files Process Automation | Endava

The client, a leading provider of banking solutions, was struggling to automate the task of sorting large volumes of data from multiple files.

- **Decreased the solution runtime from 1 hour to 25 minutes** by developing a solution to handle multiple files simultaneously.
- **Increased application response time by 30%** by optimizing and testing the code.
- **Ensured application stability** by developing automated tests and simulating an environment with 1,000 files processed per second.

Skills: MarkLogic DB, NodeJs, Jest

Senior NodeJs Developer
March 2022 - February 2023

Database Solution Provider | Endava

The client, a global provider of database solutions, was struggling to increase adoption rates and attract new customers.

- **Increased the adoption rate by 2X** by developing advanced connectivity modules for seamless integration.
- **Reduced response time by 35%** through a streamlined codebase and rigorous automated testing.
- **Increased sales by 50% in one year** by implementing a licensing feature in an npm module developed by the company.
- **Reduced business complexity by 20%** by contributing to decision-making processes.

Skills: MarkLogic DB, NodeJs, GraphQL, Jest, Postman, React, TypeScript

Senior React Native Developer
September 2021 - March 2022

React-native News Media Application | Freelancer

The client, one of the top news applications in Europe, was struggling with reaching new users and maintaining retention within the application.

- **Boosted user retention by 30%** by implementing a bookmark feature in the application.
- **Ensured application stability for users by 80%** by implementing a feature that forces users to upgrade the application.
- **Eliminated vulnerabilities in the application** by upgrading and implementing the latest stable versions of the modules.

Skills: React-Native, GraphQL, Jest

Senior React Native Developer
January 2021 - September 2021

Personal Collection of Artifacts Application | Freelancer

The client, a pioneering provider of collection management and archival solutions, was facing user frustration regarding the true value of their antique objects due to fragmented tools and a lack of integrated expert support.

- **Improved user experience by 3X** and **increased adoption rate by 45%** by eliminating errors and implementing a cleaner, more efficient codebase.
- **Increased sales by 50%** by successfully developing and launching the application in the store.
- **Boosted stability by 15%** with the seamless integration of a cutting-edge speech-to-text module.

Skills: React-Native, Swagger, TypeScript

Senior React Native Developer
June 2020 - January 2021

Golf Course Reservation Application | Centyso

The client, one of the top golf associations in the USA, was struggling with managing the rental process for golf courses by association players.

- **Reduced the time spent on renting a field by 40%** by simplifying the process.
- **Increased user adoption by 3X in one year** by implementing GHIN authentication during the application onboarding process.
- **Boosted application stability by 50%** by writing mock and unit tests.

Skills: React-Native, Swagger, Jest

Senior React Developer

December 2019 - June 2020

Car-sharing Mobility Application | Centyso

The client, a global leader in car-sharing mobility, was facing challenges in streamlining the onboarding process for Norwegian users.

- **Boosted user adoption in the Nordic region by 50%** through the successful implementation of the solution.
- **Improved the onboarding process by 90%** through a cleaner, well-maintained codebase.
- **Reduced onboarding time from 45 minutes to 10 minutes** by optimizing workflows and refactoring the codebase.

Skills: ReactJs, NodeJs, TypeScript, ExpressJs, SqLite3, Websockets, Jest

Senior React Developer

June 2019 - December 2019

Software for Running an IoT Cardboard | Centyso

The client, a beach owner in Spain, was facing complaints from customers about the lack of secure lockers for their belongings.

- **Boosted the locker purchasing process by 40%** by implementing a fingerprint authentication system.
- **Increased the number of clients by 2X** by implementing the IoT locker solution.
- **Boosted user retention by 60%** by implementing a cleaner interface and smoother animations.

Skills: ReactJs, NodeJs, , ExpressJS, SqLite3, Raspberry Pi, C, Websockets, BalenaOS, Docker, Jest
